PROFILE:

An enthusiastic tech lover, with the aim of making tech a lifestyle not just for me but for all. I have the skill set to achieve tech goals from tech ideas I encounter. Over the years, I have gained very useful experience in the process of supporting several tech innovative endeavors while pursuing my undergraduate studies. I have worked on several web projects, and have as well analyzed data of different sorts. With my expertise, I am well equipped to execute (big) data analysis and to join any group in carrying out a project and to get any task given to me done based on my listed skills.

EDUCATION:

INSTITUTION	YEAR	CERTIFICATE OBTAINED
Federal University of Agriculture Abeokuta	2025	BSc, Mathematics (FUNAAB)
Oritamefa Baptist Model School, Ring-Road, Oyo State.	2020	West African School Certificate

WORK EXPERIENCE:

Here are few projects I worked on;

1. https://property-pulse-eosin-mu.vercel.app/ – Building a React-based property rental platform for easy property search, booking and management.
2. https://fao-spec.github.io/pinetwork/ - This project represent a crypto exchange platform that converts crypto asset into fait currency. It is still in the developmental stage.
3. https://portfolio-1-2avc.onrender.com – This is my portfolio website. It is also my first full-stack project ever and it was built with python using Django framework.
4. https://fao-spec.github.io/PropertyPulse-hardcode/ - This project tested my HTML, CSS, and basic JavaScript skills.
5. https://fao-spec.github.io/youtube-clone/ - This is one of the first project I worked on. It tested my HTML and CSS skills

PROFESSIONAL QUALIFICATIONS:

1. Full-stack web development at HANDS ON INSTITUTE OF INFORMATION TECHNOLOGY (HiiT) PLC;
2. Next. Js From Scratch by Brad Traversy;
3. UDEMY; HTML and CSS Full Course;
